Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Schneiderbauer (US 6782194).

Schneiderbauer discloses an evaporator comprising: a housing adapted to receive a bottle with a wick protruding therefrom; an electrical plug assembly coupled to said housing for supporting the evaporator in a wall outlet; a heating device disposed within said housing in electrical communication with said electrical plug assembly; and an adjuster disposed in said housing and adapted to adjust a spacing of the wick relative to said heating device, said adjuster including a retaining mechanism that retains said adjuster in one of a plurality of discreet

adjustment settings, further comprising a bottle containing a substance to be evaporated, and a wick having a lower portion disposed in the substance in said bottle and an upper portion protruding from said bottle, wherein said bottle and said wick are detachably received by said housing.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Ambrosi et al. (US 6466739).

Ambrosi discloses an evaporator comprising: a housing adapted to receive a bottle with a wick protruding therefrom; an electrical plug assembly coupled to said housing for supporting the evaporator in a wall outlet; a heating device disposed within said housing in electrical communication with said electrical plug assembly; and an adjuster disposed in said housing and adapted to adjust a spacing of the wick relative to said heating device, said adjuster including a retaining mechanism that retains said adjuster in one of a plurality of discreet adjustment settings, further comprising a bottle containing a substance to be evaporated, and a wick having a lower portion disposed in the substance in said bottle and an upper portion protruding from said bottle, wherein said bottle and said wick are detachably received by said housing.

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Schroeder et al. (US 5647053).

Schroeder discloses an evaporator comprising: a housing adapted to receive a bottle with a wick protruding therefrom; a heating device disposed within said housing and adapted to apply heat to the wick; and an electrical plug assembly, including a plug deck, coupled to said housing for supporting the evaporator in a wall outlet and supplying power to said heating device, said

plug deck being rotatable in order to support the evaporator in an upright position in both horizontal and vertical wall outlets, and said plug deck including a locking mechanism which retains said plug deck in one of a plurality of discrete positions relative to said housing, and an adjuster disposed within said housing and adapted to adjust a spacing of the wick relative to said heating device, said adjuster including a retaining mechanism that retains said adjuster in one of a plurality of discreet adjustment settings.

Allowable Subject Matter

Claims 4-14, and 16-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
